Subject Index

Adjustable prosthesis, transradial prosthesis, design for affordability, application, and performance of, 80
Alignment perturbations, transtibial prosthetic foot rollover kinetics for, using load cell and force-moment analysis, 160
Alkaline phosphatase, heterotopic ossification, measurement of, using, 138
Ancient Egypt, artifical toe restoration, biomechanical assessment of, from, 181
Ankle-foot orthosis, gait recovery in adults after stroke, 111
Artifical limb, powered inverting and everting prosthetic foot for lower limb amputee balance, 175

Body powered prosthesis, phantom limb sensations, prosthesis use and rehabilitation, interaction of, 25
Bone growth, heterotopic ossification, volumetric measurement and clincal screening of, 138
Boone, David A., Editorial Comments, 53, 99, 159
Brace, effectiveness of, in osteoarthritis pain treatment, 39

C-Leg, stair descent training using, for transfemoral amputees, 10
Clinical protocol, pattern recognition-controlled prostheses, patient training for, 56
Combat injuries, prostheses and mobility-related assitive technology among service members and veterans, 144
Computerized gait analysis, artifical toe restoration, biomechanical assessment of, from ancient Egypt using, 181
Custom knee orthoses, Ehlers-Danlos syndrome, treatment of hypermobility and instability in, 133
Cycling, residual limb and prosthetic socket movement measurement during, 19

Disability assessment, prosthetic outcome measures, reliability and validity of, for upper limb amputation, 192

Earthquake, upper-limb prosthetic services in Haiti, 77
Ectopic bone, heterotopic ossification, volumetric measurement and clinical screening of, 138
Ehlers-Danlos syndrome, bilateral custom knee orthoses, hypermobility and instability treatment using, 133
EMG, ankle-foot orthosis and gait analysis in adults after stroke, 111
Energy expenditure, microprocessor and nonmicroprocessor knee, in transfemoral amputees, 202
Extreme athletics, specialized mountaineering stepping patterns, spatiotemporal parameters and step activity of, by transtibial amputees, 153

Fat graft, use of, to below-elbow prosthesis fitting, 50
Foot orthotics, cohort-controlled trial of, in trochanteric bursitis, 107
Force-moment analysis, transtibial prosthesis foot rollover kinetics, alignment perturbation on, using, 160
Functional activity,
knee orthoses, effectiveness of, in osteoarthritis pain treatment, 39
nonmicroprocesssor and microprocessor knee prostheses, balance, balance confidence, and falls using, in vascular transfemoral amputees, 16
Functional neuromuscular stimulation, sensor-based stance control orthosis and, for walking after spinal cord injury, 124

Gait
ankle-foot orthosis and gait recovery in adults after stroke, 111
microprocessor and nonmicroprocess knee, energy expenditure of, in transfemoral amputees, 202
prosthetic foot effect on residuum-socket interface pressure during, in transtibial osteomyoplastic amputation person, 211
specialized mountaineering stepping patterns, spatiotemporal parameters and step activity of, by transtibial amputees, 153

Haiti, upper-limb prosthetic services in, 77
Heterotopic ossification, volumetric measurement and clinical screening of, 138
Hip pain, foot orthotics, cohort-controlled trial of, in trochanteric bursitis, 107
Hybrid neuroprosthesis, sensor-based stance control orthosis and functional neuromuscular stimulation for walking after spinal cord injury, 124

Infection, heterotopic ossification, volumetric measurement and clincal screening of, 138
Interface/socket, transradial adjustable prosthesis, design for affordability, application, and performance of, 80

Klippel-Trenaunay-Weber syndrome, prosthetic rehabilitation, 34
Knee-ankle-foot orthoses, stance control orthoses *vs.*, 2
Knee flexion movement, stance control orthoses for, 2
Knee orthoses, effectiveness of, in osteoarthritis pain treatment, 39
Kyberd, Peter, Editorial on Advances in Upper Limb Prosthetics - MEC'11, 54

Leg amputation, specialized mountaineering stepping patterns, spatiotemporal parameters and step activity of, by transtibial amputees, 153
Lipomodelling, use of, to below-elbow prosthesis fitting, 50
Literature reviews, stance control orthoses, clinical benefits of, 2
Load cell, transtibial prosthesis foot rollover kinetics, alignment perturbation on, using, 160
Locomotor Capabilities Index, bilateral custom knee orthoses, functional outcomes of, in hypermobility and instability treatment of Ehlers-Danlos syndrome, 133
Low cost prosthesis, transradial adjustable prosthesis, design for affordability, application, and performance of, 80
Lower limb amputees
Klippel-Trenaunay-Weber syndrome, prosthetic rehabilitation of, 34

non-microprocessor and microprocessor knee, balance, balance confidence, and falls using, in vascular transfemoral amputees, 16
powered inverting and everting prosthetic foot for balance assistance, 175
stance control orthoses for, clinical benefits of, 2
Low resource, upper-limb prosthetic services in Haiti earthquake, awareness of, 77

Mauch Swing and Stance knee, stair descent training using, for transfemoral amputees, 10
Microprocessor knee
balance, balance confidence, and falls using, in vascular transfemoral amputees, 16
energy expenditure of, in transfemoral amputees using nonmicroprocess and, 202
stair descent training using, for transfemoral amputees, 10
Mobility-related assistive technology, utilization of prostheses and, among service members and veterans, 144
Motor control/learning, Bernstein's levels of construction of movement of upper limb prosthetics and, 67
Multifunctional prosthesis, pattern recognition-controlled prostheses, patient training for, 56
Myoelectric prosthesis
pattern recognition-controlled prostheses, patient training for, 56
pattern recognition, weight and inertia effects on, in relax state, 86
phantom limb sensations, prosthesis use and rehabilitation, interaction of, 25
powered partial hand prostheses, experiences and outcomes, 93

Occupational therapist, phantom limb sensations, prosthesis use and rehabilitation, interaction of, 25
Osteoarthritis, knee orthoses, effectiveness of, in reducing pain, 39
Outcome measures
nonmicroprocesssor and microprocessor knee prostheses, balance, balance confidence, and falls using, in vascular transfemoral amputees, 16
reliability and validity of prosthetic, for upper limb amputation, 192

Pain, treatment of osteoarthritis, effectiveness of knee orthoses in, 39
Paresis, stance control orthoses for, clinical benefits of, 2
Partial hand amputation, powered prostheses, experiences and outcomes, 93
Pattern recognition
Bernstein's levels of construction of movement of upper limb prosthetics, 67
myoelectric prosthesis weight and inertia effects on, in relax state, 86
pattern recognition-controlled prostheses, patient training for, 56
Phantom limb pain, phantom limb sensations, prosthesis use and rehabilitation, interaction of, 25
Physical therapy
prosthetic knees, stair descent training using, for transfemoral amputees, 10
specialized mountaineering stepping patterns, spatiotemporal parameters and step activity of, by transtibial amputees, 153
Pistoning, residual limb and prosthetic socket movement measurement during cycling, 19
Powered prostheses, experiences and outcomes, in partial hand amputees, 93
Prostheses/prosthesis
microprocessor and nonmicroprocess knee, energy expenditure of, in transfemoral amputees, 202
pattern recognition-controlled prostheses, patient training for, 56
pattern recognition, myoelectric prosthesis weight and inertia effects on, in relax state, 86
powered inverting and everting prosthetic foot for lower limb amputee balance, 175
powered partial hand prostheses, experiences and outcomes, 93
specialized mountaineering stepping patterns, spatiotemporal parameters and step activity of, by transtibial amputees, 153
utilization of mobility-related assistive technology and, among service members and veterans, 144
Prosthesis design
residual limb and prosthetic socket movement during cycling, 19
transradial adjustable prosthesis, affordability, application, and performance of, 80
Prosthesis fit, lipomodelling to below-elbow, 50
Prosthetic foot rollover, alignment perturbations on, using load cell and force-moment analysis in transtibial amputees, 160
Prosthetic rehabilitation, Klippel-Trenaunay-Weber syndrome, 34
Prosthetics
Bernstein's levels of construction of movement of upper limb prosthetics, 67
nonmicroprocesssor and microprocessor knee, balance, balance confidence, and falls using, in vascular transfemoral amputees, 16
outcome measures, reliability and validity of, for upper limb amputation, 192
upper-limb prosthetic services in Haiti earthquake, 77
Prosthetic science, artifical toe restoration, biomechanical assessment of, from ancient Egypt and signifance to history of, 181
Prosthetic socket pressure, prosthetic foot effect on, and gait characteristics in transtibial osteomyoplastic amputation person, 211
Prosthetic toe, biomechanical assessment and restoration of, from ancient Egypt and significance to prosthetics history, 181
Prosthetic training, Bernstein's levels of construction of movement of upper limb prosthetics and, 67
Prosthetist, phantom limb sensations, prosthesis use and rehabilitation, interaction of, 25
Psychometric evaluation, prosthetic outcome measures, reliability and validity of, for upper limb amputation, 192

Reciprocal gait, prosthetic knees, stair descent training using, for transfemoral amputees, 10
Rehabilitation
phantom limb sensations, prosthesis use and, interaction of, by upper limb amputees, 25
prostheses and mobility-related assitive technology among service members and veterans, 144
prosthetic, Klippel-Trenaunay-Weber syndrome, 34
prosthetic knees, stair descent training using, for transfemoral amputees, 10
residual limb and prosthetic socket movement measurement during cycling, 19

specialized mountaineering stepping patterns, spatiotemporal parameters and step activity of, by transtibial amputees, 153
Residual limb movement, measurement of, and prosthetic socket movement during cycling, 19
Residuum-socket interface, prosthetic foot effect on, and gait characteristics in transtibial osteomyoplastic amputation person, 211

Sardó, Keith R., Editorial on Prosthetic Evaluation Questionnaire for Orthoses, 100
Sensor-based knee control, functional neuromuscular stimulation and orthosis with, for walking after spinal cord injury, 124
Socket, measurement of residual limb movement and, during cycling, 19
Sport prosthesis, transradial adjustable prosthesis, design for affordability, application, and performance of, 80
Stance control orthoses
clinical benefits of, 2
sensor-based functional neuromuscular stimulation and, for walking after spinal cord injury, 124
Stroke, ankle-foot orthosis and gait recovery in adults after, 111

Targeted muscle reinnervation, Bernstein's levels of construction of movement of upper limb prosthetics after, 67
Terminal device, transradial adjustable prosthesis, design for affordability, application, and performance of, 80
Timed up and go test, bilateral custom knee orthoses, functional outcomes of, in hypermobility and instability treatment of Ehlers-Danlos syndrome, 133
Training
pattern recognition-controlled prostheses, 56
upper-limb prosthetic services in Haiti earthquake, 77
Transfemoral amputees
non-microprocessor and microprocessor knees prostheses, balance, balance confidence, and falls using, in vasuclar, 16
prosthetic knees, stair descent training using, for, 10
Transfemoral amputees, stair descent training using prosthetic knees, for, 10
Transradial amputees, adjustable prosthesis, design for affordability, application, and performance of, 80
Transtibial amputees
powered inverting and everting prosthetic foot for balance assistance, 175
prosthesis foot rollover kinetics, alignment perturbation on, using load cell and force-moment analysis in, 160
residual limb and prosthetic socket movement measurement during cycling, 19
Transtibial osteomyoplastic amputation, residuum-socket interface pressure and gait characteristics, prosthetic foot effect on, in person with, 211
Traumatic amputation, prostheses and mobility-related assitive technology among service members and veterans, 144
Trochanteric bursitis, foot orthotics, cohort-controlled trial of, 107

Upper limb amputees
Bernstein's levels of construction of movement of upper limb prosthetics, 67
lipomodelling to below-elbow prosthesis fitting, 50
pattern recognition-controlled prostheses, patient training for, 56
pattern recognition, myoelectric prosthesis weight and inertia effects on, in relax state, 86
phantom limb sensations, prosthesis use and rehabilitation, interaction of, 25
powered partial hand prostheses, experiences and outcomes, 93
prosthetic outcome measures, reliability and validity of, 192
prosthetic services in Haiti earthquake, 77
transradial adjustable prosthesis, design for affordability, application, and performance of, 80

Variable pinch force, transradial adjustable prosthesis, design for affordability, application, and performance of, 80
Veterans, prostheses and mobility-related assitive technology among service members and, 144

Walking in paraplegia, sensor-based stance control orthosis and functional neuromuscular stimulation for, 124
